Throughout the Ages: Towards an International Convention for the Prevention and Punishment of the Crime of Forcible Displacement (International Humanitarian Law):

0 of 1 people found the following review helpful. Every international law student should read this book. By James M. Dawson Groundbreaking. A book for every international law student and professor. New ideas offered. For today's world of conflict. Enough said.

Forcible displacement transforms cultures and can even lead to their destruction. Beginning with the origins of the human species millions of years ago and ending up in our present day era, this book analyses examples of forcible displacement in order to examine the crime in its many different forms. The legal contours of the crime receive a comprehensive treatment, including the experience of the international tribunals and decades of scholarly work in the area. The authors suggest that a paradigm shift is needed in order to bring development-induced displacement into the mainstream discourse on forcible displacement. The book concludes with a proposal for a new convention for the prevention and punishment of the crime of forcible displacement.

"Grant Dawson and Sonia Farber's book calls attention to an important set of questions related to forced migration. The authors should be commended for dealing in a single book with questions as diverse as the protection of refugees and internally displaced persons, regulations on development induced displacement and resettlement and the international criminal law addressing the crime of forcible displacement." -Beno-"t Mayer, University of Singapore
