Edward Graham, J. David Richardson : Global Competition Policy (Institute for International Economics)
before purchasing it in order to gage whether or not it would be worth my time, and all praised Global Competition Policy (Institute for International Economics):

There is growing consensus among international trade negotiators and policymakers that a prime area for future

multilateral discussion is competition policy. Competition policy includes antitrust policy (including merger regulation and control) but is often extended to include international trade measures and other policies that affect the structure, conduct, and performance of individual industries. This study includes country studies of competition policy in Western Europe, North America, and the Far East (with a focus on Japan) in the light of increasingly globalized activities of business firms. Areas where there are major differences in philosophy, policy, or practice are identified, with emphasis on those differences that could lead to economic costs and international friction. Alternatives for eliminating these costs and frictions are discussed, including unilateral policy changes, bilateral or multilateral harmonization of policies, and creation of new international regimes to supplement or replace national or regional regimes.

About the Author Edward M. Graham (1944-2007) was a senior fellow at the Peterson Institute from 1990 to 2007. He also taught concurrently as adjunct professor at Columbia University in New York. Previously he was an economist at the US Treasury and taught full-time in the business schools of several US universities (MIT, University of North Carolina Chapel Hill, Duke University, among others). While serving at the Treasury, he was seconded for two years to the Organization for Economic Cooperation and Development (OECD) in Paris. He also served as visiting or adjunct faculty at the University of Virginia, Charlottesville; Stanford University (Washington Program); The Johns Hopkins University; Seoul National University; Harvard University (John F. Kennedy School of Government); INSEAD (European Institute of Administration, Fontainebleau, France); and the University of Paris I (Pantheon/La Sorbonne). His research interests have included foreign direct investment, international competition policy, and the industrial organization of major Asian economies. J. David Richardson was a Senior Fellow Emeritus and has been a Professor of Economics (and International Relations) at Syracuse University. He writes extensively on international trade policy and its effects. He specializes in empirical research on trade under imperfect competition, on regional trade, and on trade and labor-market outcomes, with a focus on the United States. He has authored two books, co-edited nine books, and written numerous other monographs, book chapters, and papers for professional journals.
