Edited by Duncan French : Global Justice and Sustainable Development (Legal Aspects of Sustainable Development) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Global Justice and Sustainable Development (Legal Aspects of Sustainable Development):

In recognising the significant role international law can play in supporting the objectives of justice and sustainable development, *Global Justice and Sustainable Development* provides a wide-ranging analysis of some of the most fundamental challenges facing global society. In particular, the volume seeks to consider the synergies between sustainable development and global justice - two notions that are simultaneously hugely important and, in equal measure, enormously contentious within both international law and international relations. Organized in a three-part structure, *Global Justice and Sustainable Development* revisits some of the basic assumptions on which the general principles are built, considers the implications for differing aspects of international law, and focuses on national and regional approaches.

About the Author Duncan French is Professor of International Law at the University of Sheffield. He is also co-rapporteur of the International Law Association (ILA) Committee on International Law on Sustainable Development.
