**David Burnet : Housing Law** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Housing Law:

The aim of this book is to describe and explain the main features of housing law as applied to the modern housing market in the private and public sectors. It addresses basic issues such as status, security of tenure and rent and repair rights. The private rented sector and short term residential tenancies are considered along with the law affecting

council and housing association tenants and the nature of housing provision topics such as the law of homelessness and the privatisation of public sector housing. The book also covers the Housing Act 1996. The author seeks to place the legal issues in context so as to engender an understanding of housing issues as a whole, which affect millions of people with different forms of housing tenure.

Clearly the most up to date, student-friendly text on this topic. -- Martin Hemmings, University of Salford.  
About the Author David Burnet, BA, LL.M, is Lecturer in Law at Cardiff Law School
