before purchasing it in order to gage whether or not it would be worth my time, and all praised Sngal. Les femmes rurales l'preuve d'une citoyennet foncire (French Edition):

Women's access to land resources has been the subject of several studies and publications. However, few have explored this issue from the perspective of gender, and citizenship rights of rural women. In addition, researchers and development practitioners have lamented the acute shortage of reliable data and statistics, disaggregated by several perspectives (gender, ethnicity, agro-ecological location, among others) allowing detailed analyses of women's access to land in Senegal. This book has attempted to meet these interrelated demands. Combining quantitative and qualitative methods, and interrelated perspectives (law, economics, politics, geography, etc.), it confirms some knowledge but shows a differentiation of the systems of exclusion of women in the access and control of land resources, systems that appear to be related to socio-cultural realities specific to each agro-ecological zones of Senegal. While providing opportunities to identify the links between access to land and strengthening the citizenship of Senegalese women, this book presents the challenge of adopting an inclusive and collaborative demarche in the struggle for women's access to agricultural land in particular.
