## Native American Communities:

0 of 0 people found the following review helpful. **Practical Guidance for Developing Tribal Economies** By Simon Rondepelle This book provides very useful information and links for developing almost any aspect of an on-reservation economy, and is a great tool for strategic economic planning. Highly recommended.

Each year, billions of dollars of funding and technical assistance are available to native governments, businesses, and individuals for a wide variety of economic and community development activities. From multi-million dollar tax-exempt bonds to microloans, tribal governments and businesses can access capital from public and private sources to create companies, construct housing, produce energy, build infrastructure essentially any element of an economic development program. Written by an internationally recognized legal expert and educator, *Strategies and Methods for Tribal Economic Development* provides strategic-level guidance for tribal economic development planning, along with connections to available funding and resources for implementing the selected strategies. Each chapter includes website addresses for the specific programs being discussed, allowing the reader to go directly from the program description to the online link for the program in one step. The book also offers practical advice for combining multiple funding sources and support services into a comprehensive development approach. For tribal leaders and businesses interested in pursuing opportunities in native communities, *Strategies and Methods for Tribal Economic Development* is an invaluable resource for planning and implementing programs for sustainable economic growth.

**About the Author** W. Gregory Guedel is chair of Native American Legal Services at Foster Pepper PLLC, and serves as chair of the American Bar Association's Committee on Native American Concerns. He advises tribal governments, native-owned businesses, and their partners on business development, contracting and commercial transactions, complex construction projects, and litigation and dispute resolution. He is a lecturer and program director at the University of Washington, and is the editor of the legal weblog *Native Legal Update*.
