From Brill - Nijhoff : Sustainable Justice: Reconciling Economic, Social and Environmental Law before purchasing it in order to gage whether or not it would be worth my time, and all praised Sustainable Justice: Reconciling Economic, Social and Environmental Law:

3 of 3 people found the following review helpful. Important View of Emerging Transnational law By P. Nagy Sustainable Justice: Reconciling Economic, Social And Environmental Law edited by Marie-Claire Cordonier

Segger, C.G. Weeramantry (Martinus Nijhoff: Brill Academic) is based on a collection of essays and on the conference papers from Sustainable Justice 2002, which CISDL hosted in partnership with the McGill Law Faculty, the UNEP, the World Bank and the International Law Association, from June 14 - 16, 2002 in Montreal, Canada, prior to the 2002 World Summit on Sustainable Development in Johannesburg, South Africa. This book offers a cutting-edge scholarly discussion of judicial and legal methods to reconcile national and international economic, social and environmental law for sustainable development. A diverse anthology of perspectives from developed and developing countries, the book contains contributions from judges, international lawyers and other experts with a wealth of experience in the emerging field of sustainable development law. It presents negotiators, scholars and jurists with a lively, thought-provoking and highly current discussion of international legal debates related to sustainable development. The final part discusses future developments in sustainable development law, based on the results of three recent international processes. Sustainable Justice weaves a diverse and intriguing collection, reflecting a vigorous yet practical international legal debate of crucial importance to our common future.

Sustainable Justice: Reconciling Economic, Social and Environmental Law, the book, was possible due to the efforts of many people. In particular, the editors owe great thanks to the speakers, chairs and participants at the 2002 Sustainable Justice Conference in Montreal in 2002. They also owe thanks to the many sponsors and contributors to this conference. They also wish to acknowledge the particular work of several dedicated McGill law students, both Audrey DeMarsico and Michelle Toering, and also Sarita Keirouz and Jessica Adley, as well as Chris Petit of the WICPER in Sri Lanka, who worked hard on the conference papers and on the book. An Academic Workshop was held at the Oxford University Faculty of Law on June 02, with keynote Hon. Charles Gonthier, Wainwright Senior Research Fellow at the McGill Faculty of Law and

former Justice of the Supreme Court of Canada, and discussants Richard Tarasofsky of the Royal Institute for International Affairs Sustainable Development Programme, and Dr. Bronwen Morgan of the Oxford Centre for Socio-Legal Studies [Academic Workshop programme], and thanks are owed to all participants at this workshop whose ideas strengthened the content and approach of this new book.

This book offers a cutting-edge scholarly discussion of judicial and legal methods to reconcile national and international economic, social and environmental law for sustainable development. A diverse anthology of perspectives from developed and developing countries, the book contains contributions from judges, international lawyers and other experts with a wealth of experience in the emerging field of sustainable development law. It presents negotiators, scholars and jurists with a lively, thought-provoking and highly current discussion of international legal debates related to sustainable development. The final part discusses future developments in sustainable development law, based on the results of three recent international processes. Sustainable Justice weaves a diverse and intriguing collection, reflecting a vigorous yet practical international legal debate of crucial importance to our common future.

"A wide range of examples is included from a vast selection of topics, offering concise reflections on experiences in implementing sustainable development into various parts of the international legal system." Angela Williams, "Environmental Liability," 2005. 'A wide range of examples is included from a vast selection of topics, offering concise reflections on experiences in implementing sustainable development into various parts of the international legal system.' Angela Williams, Environmental Liability, 2005.
