Great ServiceBy panchoBest service i could hope for - all was as advertized and more great follow up from the seller about action taken...highly recommend

International migration is an ever-more central aspect of globalization in the contemporary world. This 4th edition of the leading text in the field has been completely recast and updated to provide a comprehensive assessment of the nature, extent and dimensions of international population movements and of their consequences.

s of the Fourth Edition: " [A]n impressive achievement. The empirical detail is striking, the historical overview comprehensive and the theoretical overview clear and easy to follow even without prior sophisticated knowledge of the theories covered. As an overview to the field of migration studies, this well-written [excellent fourth edition] more than serves its purpose..." - Helena Ekelund, Journal of Contemporary European Research "Castles and Miller's well-

known text... just gets bigger and better... The fourth edition reinforces the strengths... noted by reviewers and readers over the last decade and a half: a text which is authoritative yet eminently readable; a wide span of case studies from the main theatres of immigration around the world; an appropriate sense of history; useful maps (much improved over previous editions); instructive tables and textboxes... a lack of jargon and... key concepts carefully explained... Suitable for lay readers and especially valuable for undergraduates... its wide range and authoritative voice make it equally useful as a primer for graduate students and ready reference for academics and migration experts." - Russell King, *Ethnic and Racial Studies* s of previous editions: 'Widely and deservedly praised as a major achievement... Castles and Miller have their own distinctive model of the migratory process but manage at the same time to cover almost every major theme of current migration studies.' - Rainer Baubock, *Ethnic and Racial Studies* 'An historical account of the major migratory trends before the second world war, supplemented by up-to-date, comprehensive analysis of 'new migrations'. The outstanding strength of this volume is that its critique of causal explanations of migration is married to an exploration of the impact of immigration on 'host' societies.' - Susan Carruthers, *Times Higher Education Supplement*
