keep track of changing laws regarding the use and carrying of weapons, regardless of whether it's for keeping a weapon at home for home invasion, or whether you travel from state to state with 'protection' because of your business risks. A necessary evil these days. Don't buy one that is not published currently! 0 of 0 people found the following review helpful. Just bought 2017ed the other day

The one book every gun owner in Arizona should have. Complete text of all state gun laws (not just the penal code), with plain-English descriptions of the laws for private citizens and training material for concealed-carry permit applicants. You get all the rules for buying, selling, carrying, transporting, target shooting outdoors, special weapons, use of deadly force, self defense, gun safety, federal laws... it is the most complete coverage anywhere of one states handling of the Second Amendment to the U.S. Constitution. More than 150 self-test questions, 22 lethal-encounter scenarios for study and discussion, much more. Used statewide and widely endorsed. It doesnt make sense to own a gun and not know the rules You dont want to be in trouble for a rule you never heard of Ignorance is no excuse its better to know the rules You have a right to know what the laws are If you knew all your rights you might demand them
