Juan Jorge Piernas Lopez : The Concept of State Aid Under EU Law: From Internal Market to Competition and Beyond (Oxford Studies in European Law) before purchasing it in order to gage whether or not it would be worth my time, and all praised The Concept of State Aid Under EU Law: From Internal Market to Competition and

Beyond (Oxford Studies in European Law):

How has the evolution and transformation of the Common Market affected the legal concept of State aid? How has State aid adapted to the development of the European Union? These questions and more are answered in Juan Jorge Piernas Lopez's examination of the historical, political, constitutional, and economical events that have affected the development of State aid in the EU. Examining three key, interwoven arguments, this book provides a richer understanding of current formulas which depict the concept of aid through the prism of policy and enforcement considerations. First, the book demonstrates that the concept of aid is a 'living instrument' that has been applied in accordance with the main policy priorities of the European Commission. Second, contrary to what has been affirmed in other literature, the evolution of this concept has been influenced by the broader advancement of the case law of the Court of Justice in different periods of the integration process. Third, the author contends that the study of the evolution of the concept of aid in light of policy and case law provides a holistic outlook valuable to the decision making process of difficult cases. In this regard, the book provides criteria to interpret and discuss cases including *Sloman Neptun*, *Philip Morris*, and *Azores*, beyond the analysis traditionally adopted in this field.

It will be a lasting reference in the field both from a substantive and a methodological perspective. The author displays a very sophisticated understanding of the field and of the factors at play in the decision-making process. More importantly, he has found an elegant and effective way to introduce these factors in the analysis. * Pablo Ibanez Colomo, Department of Law, London School of Economics and Political Science * Piernas' recurring argument is that by focusing on the position of the Commission and developments in state aid policy, it is possible to provide a better understanding of the development of the case law. If only because of the novelty of this effort, the work is certainly a major and remarkable contribution to the field of state aid law. State aid law has not yet been approached on this basis and the coherent and consistent discussion of case law is in itself likely to set the book up as one of the important referential works for some time to come... Piernas has produced an important piece of scholarship with a clear added value. * Jotte Mulder, *European Journal of Legal Studies* *About the Author Juan Jorge Piernas Lopez, Assistant Professor of European Union and International Law, University of Murcia Juan Jorge Piernas Lopez is a Doctor of Laws from the European University Institute in Florence (2013).
