Human Rights Series, 3 (Library of Human Rights, 3) After the Second World War human rights law became entrenched in legal discourse as witnessed by a proliferation of human rights treaties. While the right of asylum was recognized as an fundamental right in the Universal Declaration of Human Rights, it has never been an absolute right but always restricted in various ways, the most important ones being that asylum should not be conferred on criminals and that refugees with a criminal background could be removed from the country of refuge. This book examines the extensive jurisprudence at the international and domestic level, which has attempted to balance the right of asylum for an individual versus the right of the state of refuge to restrict this right in situations of criminality.
