Daniel Gore, Stephen Lewis, Andrea Lofaro, Frances Dethmers : The Economic Assessment of Mergers under European Competition Law (Law Practitioner) before purchasing it in order to gage whether or not it would be worth my time, and all praised The Economic Assessment of Mergers under European Competition Law (Law

Practitioner):

This concise and practical guide to the most important economic techniques and evidence employed in modern merger control draws on the authors' extensive experience in advising on European merger cases. It offers an introduction to the relevant economic concepts and analytical tools, and stand-alone chapters provide an in-depth overview of the theoretical and practical issues related to market definition, unilateral effects, coordinated effects and non-horizontal mergers. Each form of economic evidence and analysis is illustrated with practical examples and an overview of key merger decisions.

"The book can be recommended to economists and legal practitioners alike. It provides a comprehensive and easily accessible overview of the economic concepts and empirical techniques applied in EU merger control." Arndt Christiansen, European Competition Law
