From sellier european law publishers : The Future of European Property Law before purchasing it in order to gage whether or not it would be worth my time, and all praised The Future of European Property Law:

European integration has a growing impact on the property law systems of the EU Member States. The tensions which can be seen are considerably greater than in other areas of private law, given the technically complex and mandatory nature of property law. In this book, current developments in European property law - particularly the Draft Common Frame of Reference (DCFR) - are analyzed and evaluated, focussing on secured transactions and mortgage law. With contributions by academic and practicing lawyers, the book examines: the transfer of ownership and good faith acquisition * the rules in the Member States and in Book VIII of the DCFR * secured transactions and the DCFR * the registration of intellectual property rights * trusts from a common and a civil lawyer's perspective * the border area between property law and contract law, namely securities.
