Digby Charles Jess : The Insurance of Commercial Risks: Law and Practice before purchasing it in order to gage whether or not it would be worth my time, and all praised The Insurance of Commercial Risks: Law and Practice:

Now in a new edition, this highly regarded work has been fully updated, restructured and substantially expanded and is the only specialist text devoted to the law relating to the insurance of commercial risks. Comprehensive on the relevant principles of insurance law and their application to commercial insurances, including a new chapter on the duties and liabilities of insurance brokers and intermediaries Fully updated coverage of the law relating to liability (e.g. public liability, employer's liability and commercial vehicle), property and other insurances (e.g. buildings, contents and contractors') New chapter on litigation and procedural matters embracing costs orders against liability insurers, disclosure, joinder of insurers, the insured's cause of action and limitation of actions * Deals with all aspects of claims including notification, rights of insurers and direct statutory claims against insurers Expansion of appendices to include specimen policies from major insurers, relevant statutes and statutory instruments, MIB agreements and the GISC's Commercial Code

A very readable book which sets out the law in a complex area with the minimum of jargon and the maximum of clarity.A comprehensive and practical work, which should be in the office of any reinsurer underwriting property

business in the UK.... it deservedly takes its place alongside classics such as MacGillivray and Colinvaux. The book must be of particular value to practitioners who do not deal with insurance contract issues on a regular basis.... a useful addition to the insurance law literature. *New Law Journal*, of a previous edition.
