Maher M. Dabbah : The Internationalisation of Antitrust Policy before purchasing it in order to gage whether or not it would be worth my time, and all praised The Internationalisation of Antitrust Policy:

Maher Dabbah draws on the decisional practice of relevant legal and political bodies to provide a clear and original discussion of the internationalization of antitrust policy. He examines the experiences of the E.C. and the U.S. to highlight the concepts and ideas associated with antitrust law and practice. The book concludes by predicting potential developments, and suggesting a new approach to the internationalization of antitrust policy. It will interest antitrust officials, as well as international organizations, business people, academics, researchers and policy-makers involved in antitrust law and policy.
