**(author) Richard Dean Burns : The Missile Defense Systems of George W. Bush: A Critical Assessment (Praeger Security International) (Hardback) - Common** before purchasing it in order to gage whether or not it would be worth my time, and all praised The Missile Defense Systems of George W. Bush: A Critical Assessment (Praeger Security International) (Hardback) - Common:

Opening with a history of missile defense, this book analyzes Bush's efforts to establish ground-based missiles in Eastern Europe, as well as the impact of his decisions. It includes a chapter that evaluates the technical progress of the various ABM systems and weighs the political dimensions of the deployment decision and it's cost.
