Quintin Bradley : The Tenants' Movement: Resident involvement, community action and the contentious politics of housing (Housing and Society Series) before purchasing it in order to gage whether or not it would be worth my time, and all praised The Tenants' Movement: Resident involvement, community action and the contentious

politics of housing (Housing and Society Series):

The Tenants' Movement is both a history of tenant organization and mobilization, and a guide to understanding how the struggles of tenant organizers have come to shape housing policy today. Charting the history of tenant mobilization, and the rise of consumer movements in housing, it is one of the first cross-cultural, historical analyses of tenants organizations roles in housing policy. The Tenants' Movement shows both the past and future of tenant mobilization. The books approach applies social movement theory to housing studies, and bridges gaps between research in urban sociology, urban studies, and the built environment, and provides a challenging study of the ability of contemporary social movements, community campaigns and urban struggles to shape the debate around public services and engage with the unfinished project of welfare reform.

"[T]his book represents a rich and important contribution to the study of social housing governance." *Housing Studies*, Hal Pawson, University of New South Wales "This book is definitely worth reading for academics interested in social movement theory and struggles for a decommodified housing system. Beyond that, housing activists from around the world can certainly benefit from the experience the English tenants movement has accumulated in decades of social struggles and now presented in a well-written and condensed form by Quintin Bradley." Sebastian Schipper, Bauhaus-Universität Weimar, Germany About the Author Quintin Bradley is Senior Lecturer in Planning and Housing Studies at Leeds Metropolitan University, UK.
