Nielsen, L. : The WTO, Animals and PPMs (Series on International Law and Development) before purchasing it in order to gage whether or not it would be worth my time, and all praised The WTO, Animals and PPMs (Series on

International Law and Development):

WTO, Animals PPMs offers a new analytical framework for GATT Article which inter alia clarifies the legal and analytical problems attached to non-product related PPMs. The text covers the barriers countries can enact to protect animals (as animal welfare- or biodiversity protection) in the course of trade and their consistency with the WTO rules. The analyses are, however, also useful for a broader range of environmental and moral topics.

" [t]his book covers material important to the trading system and does it well. Nielsen s writing style is clear and concise and readers will be treated to interesting background material provided on many key issues, e.g. the philosophy of animal protection " Steve Charnovitz in " International Trade Law Regulation" Vol. 14, issue 5, 2008"
